

Project / The Caulfield

Location / 2-4 Station Street, Caulfield North

Floor Count / 4

*Pre-Fabricated
Hob Formwork.
Easier, Smarter & Faster*

'Prior to commencing structure works at 2-4 Station St Caulfield our client was faced with a common problem in today's construction industry.

A very tight construction program.

Fortunately SBS Group was there to help us cater to our clients needs, they recommended we use SBS Smart Hob.

The result was far beyond our expectations, it enabled our company to hand over floors much sooner, shaving 8 days of a very tight construction program.

It also enabled us to reduce our costs by 50% purely by allocating less labour to the tasks & quicker installation times.

We were amazed at how quick and easy the product is to install.

All our sites are now running faster than ever thanks to this fantastic product.'
